njobe@geo-jobe.com

GEO-Jobe® GIS Consulting is a team of "Geospatial Thinkers" consisting of professional geographers trained to view all things from a spatial perspective. Our mission is to work with utilities, local governments, and airports to identify opportunities where GIS technology can increase their operational efficiency and then implement solutions that capitalize on these opportunities. Through our mission, we advance the technology forward, produce a more efficient public sector and a more competitive private sector, and ultimately introduce our clients to the world of geospatial thinking.

amanda.oshea@kci.com

KCI's Geospatial Solutions Practice offers comprehensive IT solutions to our clients through innovative thinking and technology. Focusing on GIS technologies, our staff of trained professionals covers the spectrum of technical services - from needs assessments to cartographic design, web development to document management, field data collection to engineering document research, and asset management to program management. For more than 20 years, KCI has been applying GIS technology for clients in virtually every technical discipline. Whether analyzing environmental impacts in a potential corridor for a magnetic levitation (Maglev) train or creating an ESRI-based critical infrastructure database for the City of Baltimore, KCI's GIS professionals have consistently demonstrated a mastery of GIS technology and its versatile applications. KCI is proud of its record of completing projects on time and within budget.
